**Luis Gonzalez selected for Release 2026 accelerator**

Los Angeles, CA 2/27/26 — Ernst & Young LLP (EY US) announced that Luis Gonzalez, Chief Executive Officer of DirectedLINK, a nationwide contingent workforce solutions firm, has been selected to participate in the EY Entrepreneurs Access Network (EAN) 2026 cohort, a 12-month business accelerator supporting growth-oriented founders.

Now in its sixth year, EAN delivers real results. 84% of alumni report revenue growth, and 71% say the program directly contributed to that growth, according to an internal EY survey.

“EAN entrepreneurs move fast and build with purpose,” said Kristina de los Angeles Hunter, EY Entrepreneurs Access Network Program Manager. “The connections formed often lead to new customers, capital opportunities and long-term collaborations. These business leaders create economic momentum that benefits all social and economic communities.”

Participants receive one-on-one coaching, tailored learnings, peer connections, and access to capital resources and the EY global entrepreneur ecosystem.

Luis, "We are honored to have been selected by EY as one of the top firms in the United States from over 700 applicants. Our national team and 10 company divisions take great pride in delivering our services to our clients since 2015."
